

INSTRUCTION MANUAL

TABLE LAMP DRUPOL 21616

Description of the lamp

The table lamp DRUPOL 21616 serves as a table lamp for lighting in living and other rooms. A swivel lampshade with a sleeve and a light bulb is mounted on a steel wire leg.

- This lamp is intended for indoor use only.
- Do not cover the switched on lamp.
- Do not make any changes to the wiring.
- Do not touch the mains plug with moist or wet hands.
- We are not liable for damages caused by failure to follow the instructions in this manual. Failure to follow these instructions will cancel the warranty!
- All repairs should be done by professionals with proper authorization.
- The lamp should not be exposed to high temperatures, high humidity, strong vibrations or excessive mechanical stress.
- Water or any other liquid is not supposed to get inside the lamp. In such case there is a danger of fire or injury by electricity. Should it occur immediately pull out the cord from the wall socket and contact the professional.
- Do not leave any flammable objects near the lamp.
- Do not switch on the lamp immediately after bringing it from a cool environment into a warm place. The condensed water could damage your lamp. Do not switch on the lamp until its temperature equals the room temperature.

Switching the lamp on and off

This lamp can only be connected to public alternating voltage 230 V / 50 Hz. Other power connection is not allowed.

- Place the lamp on an even surface (e.g. a table).
- Plug it into a mains socket 230 V/ 50 Hz.
- Switch on the lamp by the cord switch.

Light bulb change

- Before changing the bulb unplug the lamp from the electricity. Leave it to cool sufficiently.
- Do not touch the lighted bulb with bare hands.
- Unscrew the faulty bulb and screw into the bulb socket a new one of the same type: 230 V / 25 W / E14.
- Important notice: Never use a bulb with a higher power than the stated one. When using such a bulb there is a danger of overheating the lamp and a danger of fire.

Maintenance and cleaning of the lamp

- Before cleaning disconnect the lamp from electricity.
- Be sure that no water or other liquid can get inside the lamp.
- Do not use any aggressive cleaning means or chemical solvents, which could etch the surface of the lamp or influence its function.

Technical data:

Power: 230 V ~/ 50 Hz
The bulb: 230 V / E17 / max. 25 W
Dimensions: height 30 cm, base 17 x 17 cm.
